

DURACORE™

**MOTORS BUILT TO THRIVE
WHERE OTHER CANNOT SURVIVE**

Introducing DuraCORE™ featuring GORE Magnet Wire

When Failure is Not an Option

In the oil and gas industry, experiencing a **motor failure** in a **downhole** application – forcing you to pull up the entire drill string to replace that single component – is **expensive** and creates **unnecessary** delays.

That's why we developed the DuraCORE™ motor featuring GORE Magnet Wire, one of the most **rugged**, **resistant** and **reliable** electromagnetic motors on the market today for downhole applications.

Available in standard specs or in **fully customizable** solutions, DuraCORE is the best choice for your downhole motor needs.
